

INTRODUCTION 4

What is in this publication ?4

Why produce this publication ?5

How is this manual going to help me and my students ?.....5

What this manual contains6

Why PHP and which version ?6

XAMPP 7

Web server7

Xampp Installation.....7

SERVER2GO 13

LEARNING ACTIVITIES 16

Tasks and Level of Difficulty.....18

Introduction 19

 Anatomy of a web page 19

 Html code20

 PHP code21

 How PHP runs in a html page.....22

 Sample page using html and PHP22

Exercise 1 25

 Special characters and how to display them25

 Cascading Style Sheets26

 How to insert a table26

Exercise 2 28

 Using variables in a PHP page.....29

 Numeric variables.....29

 Calculations30

 String variables31

 Working with Strings.....32

Exercise 3 39

 Using programming structures – branching and looping.....39

 Using the If statement.....39

 Using the Switch statements40

 Using the While loop41

 Using the For loop42

Exercise 4 44

 Accessing System information44

 Access client information45

Using the include a File statement.....	45
Exercise 5	47
Using Arrays.....	47
Working with Arrays	48
Move, add, remove, replace elements of an array	49
Sort elements of an array	50
Associative arrays.....	50
Exercise 6	52
Using Functions.....	52
Understanding variable scope.....	53
Parameter passing by value.....	55
Parameter passing by reference	56
Exercise 7	58
Data Structures in PHP	58
Using 2 dimensional arrays.....	59
Working with queues.....	63
Implementing stacks	64
Exercise 8	69
Using Forms	69
Create a Form	71
Add elements to a Form.....	72
Process a Form.....	74
Validate elements of a Form.....	75
PHP Validation statements	75
Exercise 9	77
Using files to save data.....	77
Write to a file.....	77
Read from a file	78
Exercise 10.....	80
Saving to Files on Web servers – an introduction	80
Using Files.....	80
Format output from retrieved data	82
Sorting Output from retrieved data.....	83
A php page calling itself	87
How to cast a variable (change its type).....	89
Exercise 11.....	91
Add data to a file	94
Editing data in a file.....	96
Delete data in file.....	99
Exercise 12.....	101
Introduction to Object Oriented Programming	101
Records in PHP.....	102
Exercise 13.....	105
Constructors and Destructors.....	105
Parent class, child class and inheritance	108
Design A – use of separate files for each class to write/read.....	110
Design B – use of one file for all classes to write/read.....	116
Public, Private and Protected property or method -visibility.....	128
Useful Diagnostic Class Functions	131
Exercise 14.....	134

An introduction to data visualization.....	134
Functions Required.....	135
Graphical representation of data.....	137
Bar Graph.....	137
Exercise 15.....	142
Security - password protection of files.....	142
Session variables.....	144
Use of pop up login box for authentication.....	146
Exercise 16.....	150
Scenario - Restaurant Ordering System.....	150
The PHP Code - Restaurant Ordering System.....	157
Exercise 17.....	172
UML and Use Case Essentials.....	172
Restaurant Case Study - Design Retrospective.....	180
Use Case.....	180
SRS – background and outline.....	182
Restaurant Case Study - Design Retrospective.....	184
SRS - Software Requirements Specifications.....	184
Exercise 18.....	190
Mobile devices and PHP.....	190
Customise output based on client environment using PHP.....	196
Case Study - Mobile Utility Sales.....	204
Exercise 19.....	208
Debugging hints and tips.....	208
Debugging Worked example Exercise 14.....	212
ASSESSMENT TASK 1.....	219
Scenario 1.....	219
Scenario 2.....	220
Scenario 3.....	220
ASSESSMENT TASK 2.....	221
Scenario 1.....	221
Scenario 2.....	221
Scenario 3.....	221
GLOSSARY.....	222
